## PROJECTS

### ONEDER WEB

- This project is a modern, responsive web application built using **React.js**, designed to showcase clean UI design, smooth navigation, and a structured codebase. Developed with a focus on speed, interactivity, and maintainability, this project reflects my growing expertise in frontend development and passion for building user-friendly digital experiences.

### FURNITURE APP

This is a sleek and responsive **Furniture Store Web Application** built with **React.js**, offering users a smooth and engaging shopping experience. Designed with a focus on modern UI/UX principles, the app allows users to browse furniture collections with ease. It features clean component-based architecture, responsive layouts for mobile and desktop, and dynamic product rendering. Whether it's elegant sofas or minimalist tables, every product is presented in a visually appealing and intuitive manner.
